

Mary Poulton: Lowell Institute at University of Arizona – Since receiving her PhD in 1990 she has devoted her career to the advancement of earth science and mining education. She wrote minerals chapters for the American Geological Institute's national middle school earth science curriculum project EarthWorks and was team leader for the resources section and wrote the minerals module for the national high school earth science curriculum project EarthComm: Earth Science in My Community. Mary was a driving force in the formation of the Lowell Institute for Mineral Resources at The University and is currently its director. The IMR works with faculty and students in 27 different disciplines across 10 colleges at the university plus numerous universities around the world.
