

Andrew Neale is mineral processing engineer with more than 30 years of international experience with large and small-scale mining operations. He developed and implemented the Bonanza 100 tpd custom milling model in Nicaragua to support artisanal and small-scale mining. Earlier in his career he served as VP Technical Services for Freeport McMoRan where he was responsible for expanding production at Grasberg in Indonesia from 80,000 to 240,000 tpd.
